

Gurobi Solver for AMPL

Note: The Gurobi Solver for AMPL is a standalone solver for the AMPL modeling system. AMPL users can purchase the Gurobi Solver for AMPL in lieu of a license for the Gurobi Optimizer; AMPL is not included with Gurobi Solver for AMPL and must be purchased separately (pricing is given under the heading "AMPL" below). The Gurobi Solver for AMPL includes all Gurobi algorithms but does not include any of the application programming interfaces (APIs) of the Gurobi Optimizer.

Perpetual Named-User – Unlimited-Use, Single-Machine License **\$10,000**

This license is locked to a particular physical machine and its use is restricted to a single identified person. That person is allowed an unlimited number of simultaneous uses.

Perpetual Unlimited-User - Unlimited-Use, Single-Machine License

This license is locked to a particular physical machine. The number of simultaneous users and uses is unlimited. This license depends on the number of CPU sockets in the physical machine.

One CPU socket (up to 8 cores)	\$20,000
Each additional core	\$2,000

Perpetual Floating-Use License, Per Simultaneous Use **\$20,000**

This license runs on a single, specified local-area network of machines as specified by a list of IP addresses and address ranges. One particular physical machine in this collection acts as the license server. The Gurobi Optimizer can be installed and run on any machine on the network with an operating environment that is among the supported platforms. This license has a specified limit on the number of simultaneous Gurobi processes that can be run on the machines of this network.

Yearly Maintenance and Support Contract **20% of License List Price**

Includes support and upgrades to all releases during the period of the contract. First year maintenance and support is not included in the List Price. In the event that you do not purchase maintenance and support for some period and choose to purchase it at a later date, you will be charged the then prevailing annual maintenance and support fees for the periods that were not covered. Maintenance and support is not available on academic licenses.

AMPL

Note: Gurobi Optimization is an authorized reseller for AMPL. A corresponding license for Gurobi Optimizer or Gurobi Solver for AMPL is required to purchase AMPL from Gurobi.

Perpetual Named-User – Unlimited-Use, Single-Machine License **\$4,000**

This license is locked to a particular physical machine and its use is restricted to a single identified person. That person is allowed an unlimited number of simultaneous uses.

Perpetual Unlimited-User - Unlimited-Use, Single-Machine License

This license is locked to a particular physical machine. The number of simultaneous users and uses is unlimited. There are four versions of this license, one if there is a single CPU socket (or CPU chip), one if there are two CPU sockets, one if there are four CPU sockets, and one if there are five or more CPU sockets in the licensed machine.

One CPU socket	\$8,000
Two CPU sockets	\$14,000
Four CPU sockets	\$24,000
Five or more CPU sockets	\$36,000

Perpetual Floating-User License, Per Simultaneous User **\$6,000 per token**

This license runs on a single, specified local-area network of machines. One particular physical machine in this collection acts as the license server. AMPL can be installed and run on any machine on the network with an operating environment that is among the supported platforms. Each purchased token allows one user to run an unlimited number of simultaneous uses/processes on one machine on the network.

Yearly Maintenance and Support Contract **20% of License List Price**

Includes support and upgrades to all releases during the period of the contract. First year maintenance and support is included in the List Price. Maintenance and support is available for all paid licenses, including academic licenses. In the event that you do not purchase maintenance and support for some period and choose to purchase it at a later date, you will be charged the then prevailing annual maintenance and support fees for the periods that were not covered.

General License Restrictions

In all cases, license users and uses are restricted to you or your employees. In particular, making the Gurobi product(s) available over the Internet or similar networking technology to others who are not your employees (“hosting”) is forbidden, with the following exception: hosting that otherwise respects the limitations of the license is permitted if the product(s) is embedded in and only accessible through a user-developed application that has significant additional functionality.
